ICE-CUTTING SCENE WITH ENDLESS CHAIN IN OPERATION.

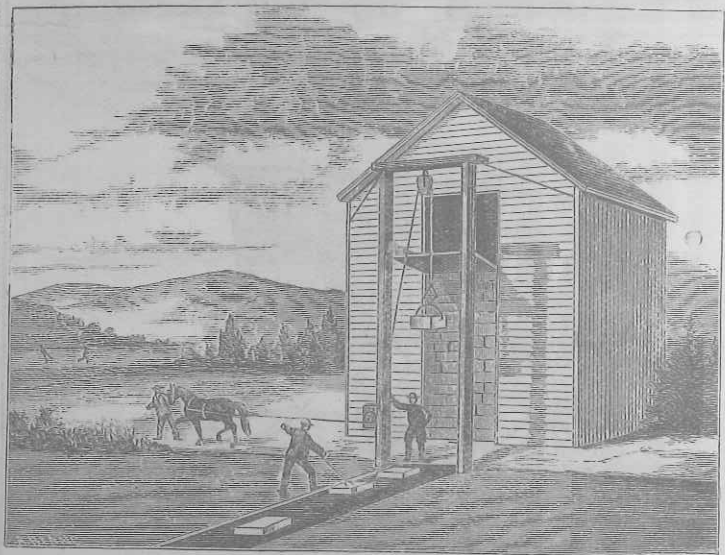

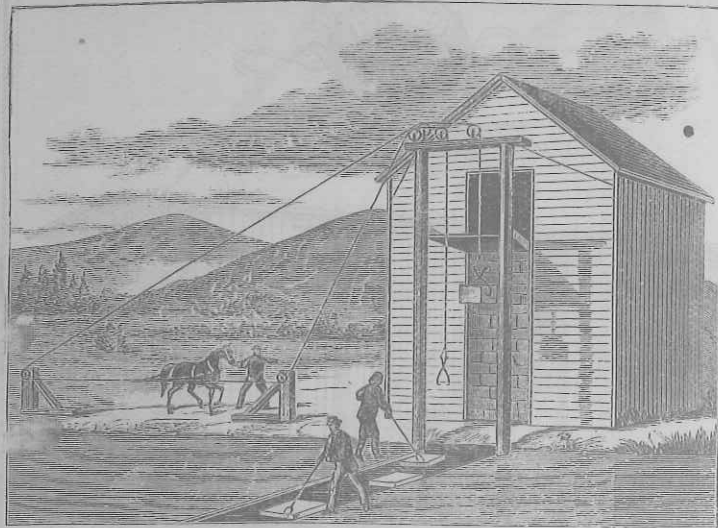

127/65 Printed 2.50

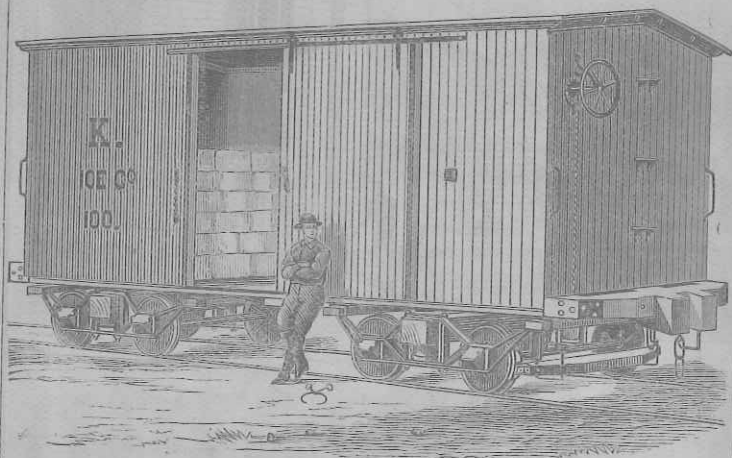

ICE-CUTTING SCENE, WITH ICE SCREW IN OPERATION.

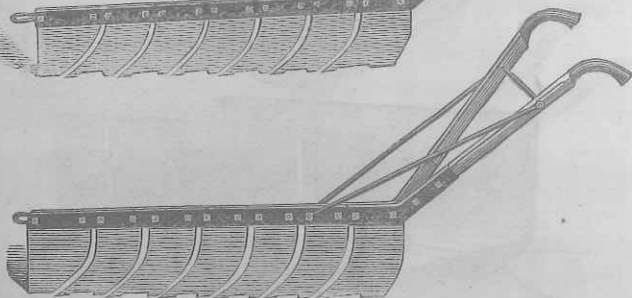

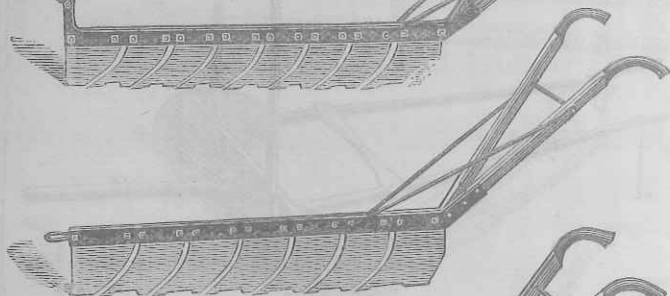

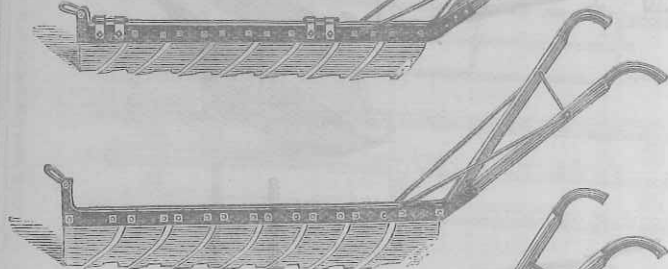

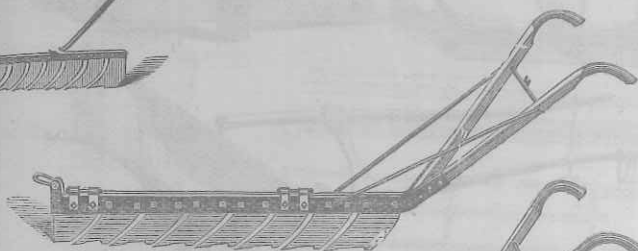

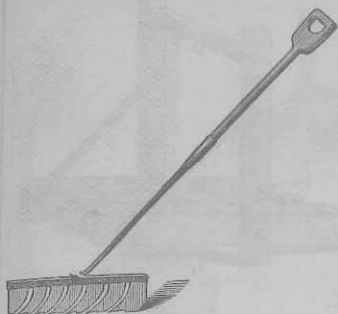

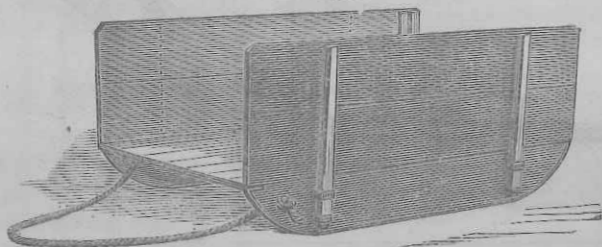

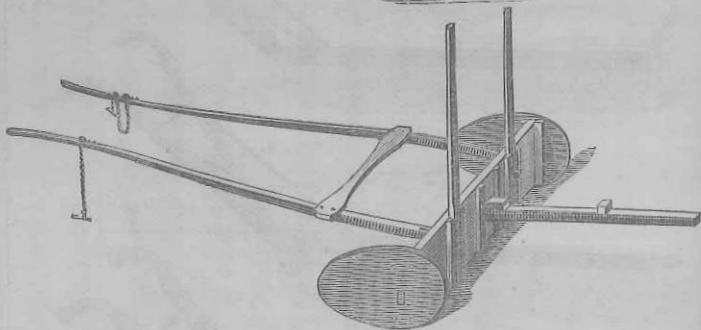

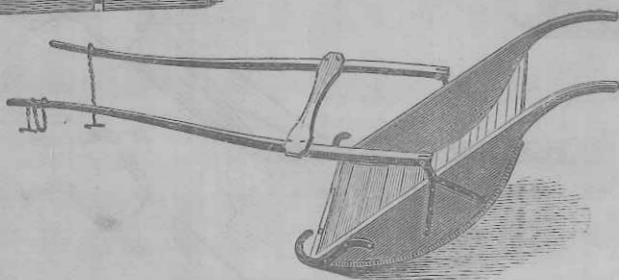

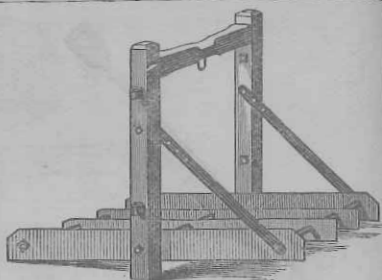

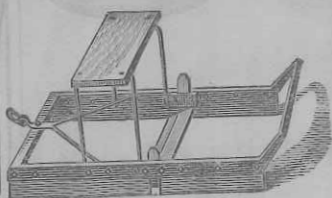

ICE-CUTTING SCENE—ICE GIGS

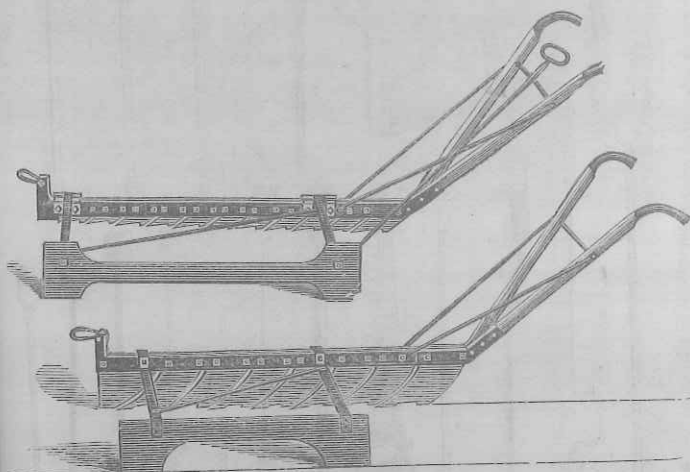

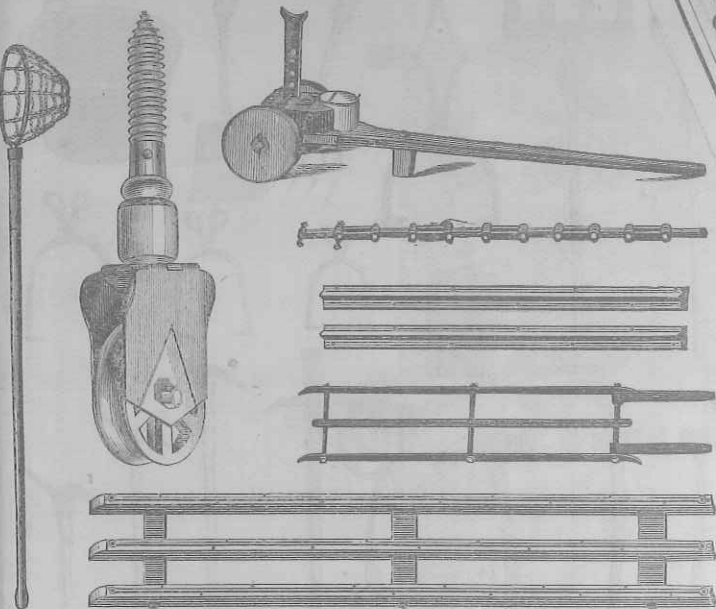

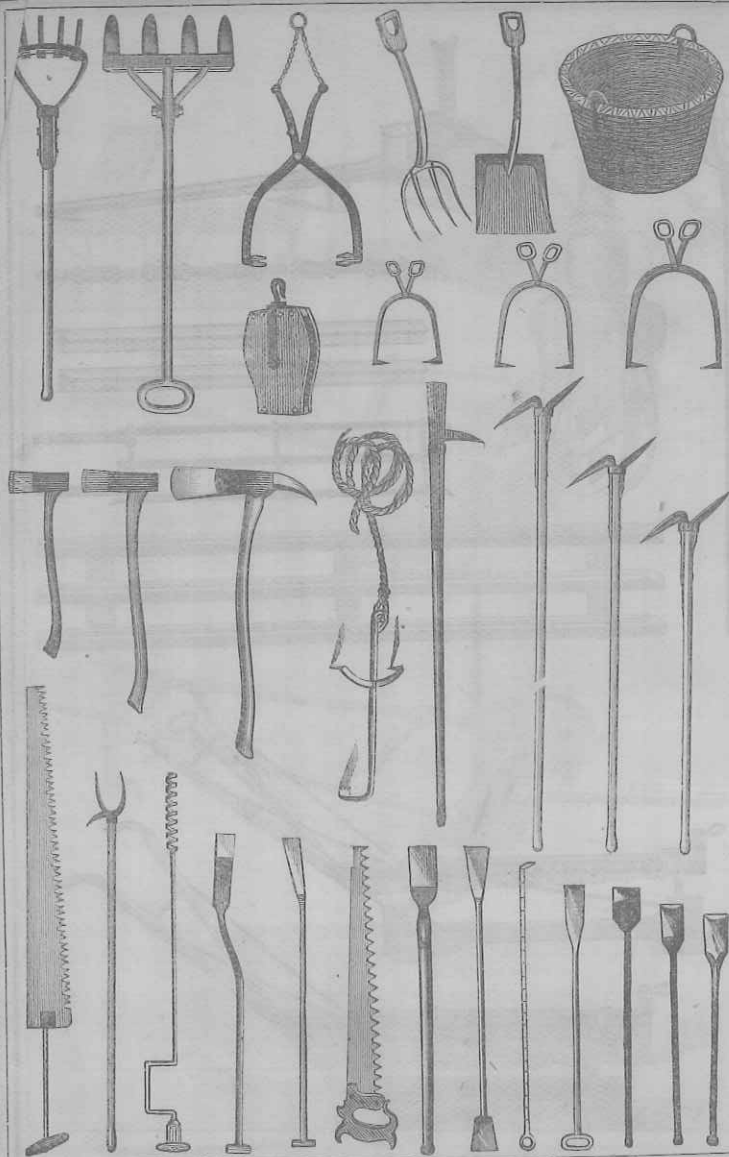

ICE-CUTTING SCENE—ICE TONGS IN OPERATION.

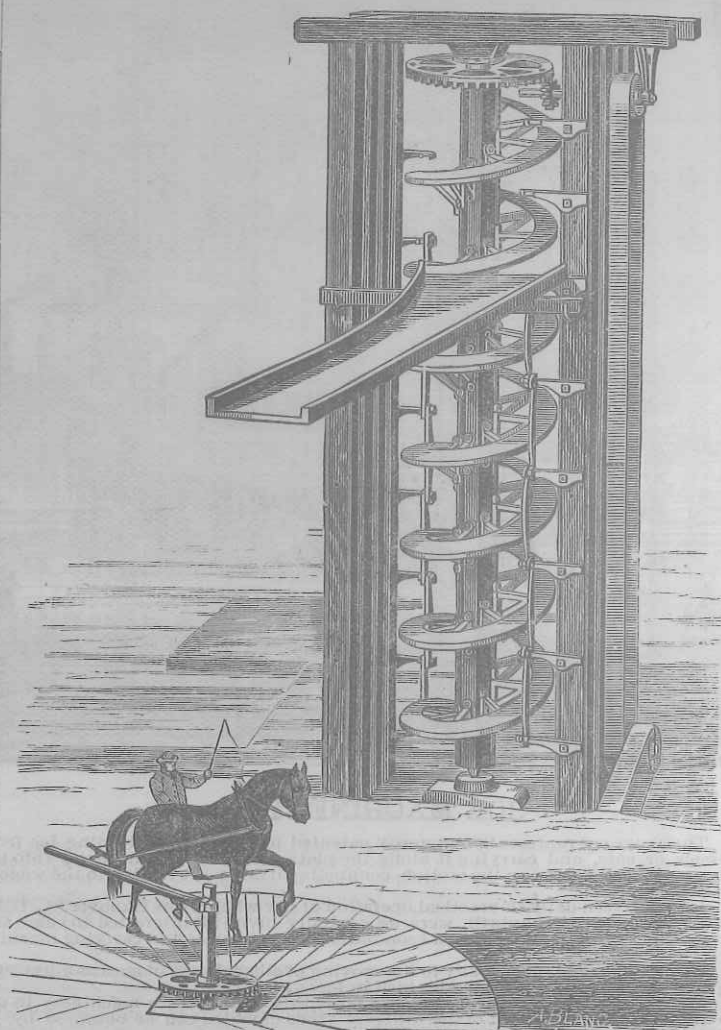

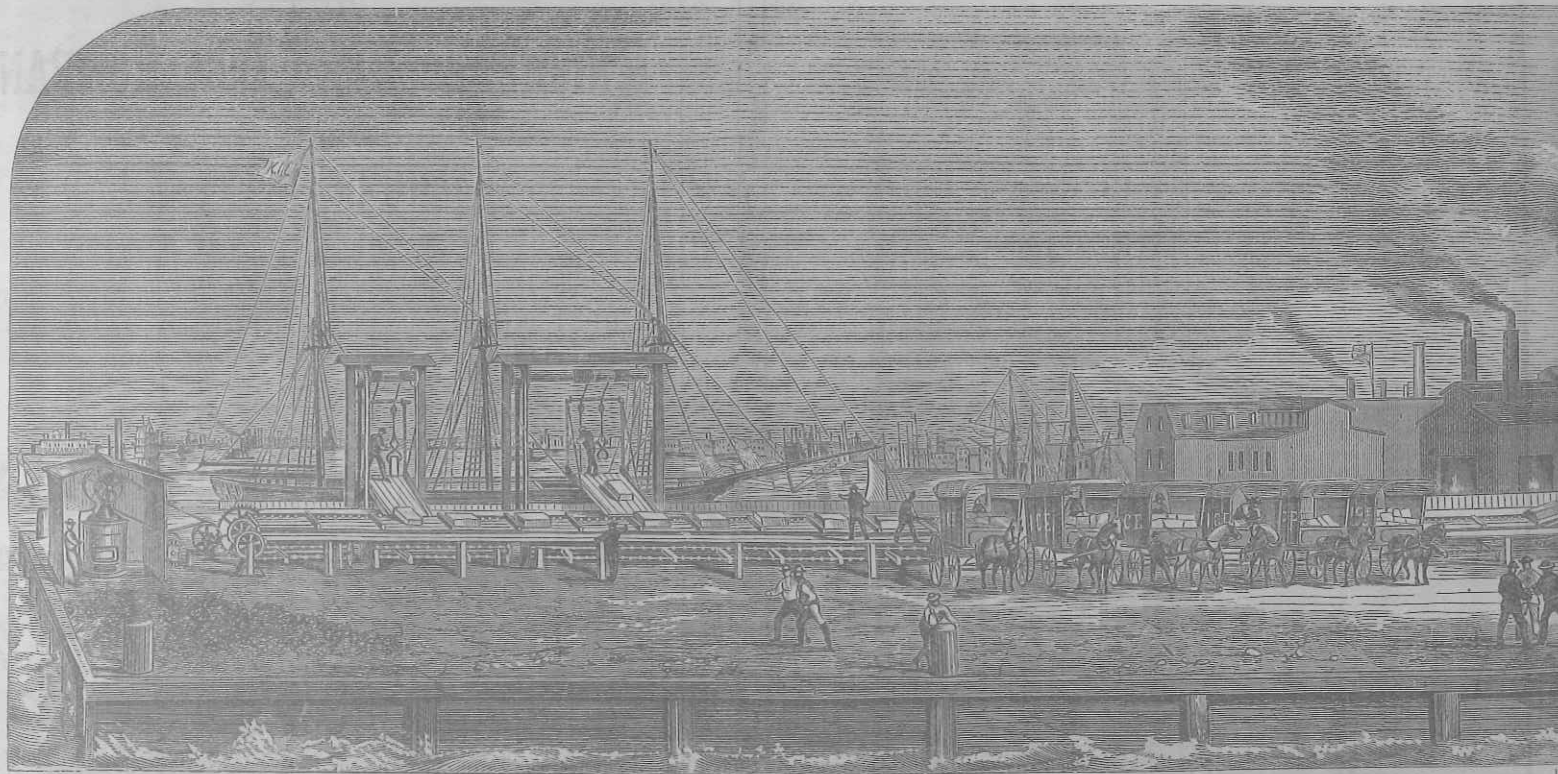

PATENT VERTICAL ICE SCREW.

ICE WHOLESALE.

Having ample storage capacity, steam power, and the most complete labor-saving machinery in use, to enable us to cut and store Ice cheaply, with extensive facilities for loading promptly for shipment either by vessels or rail, we are prepared always to contract with dealers and others to supply them at the lowest market rates.

Our shipments by vessels are made principally from our houses on the Kennebec river, Maine, which is noted for the beauty, purity and solidity of its Ice, at which point our dispatch in loading vessels has given us a preference, and we consequently command the lowest rate of freight.

We have also extensive buildings located on the railroads at the head waters of the Lehigh and Schuylkill rivers, filled with Ice, from which shipments can be made in any direction, and dealers will find it to their interest to communicate with us before purchasing elsewhere.

ICE MACHINERY, &c.

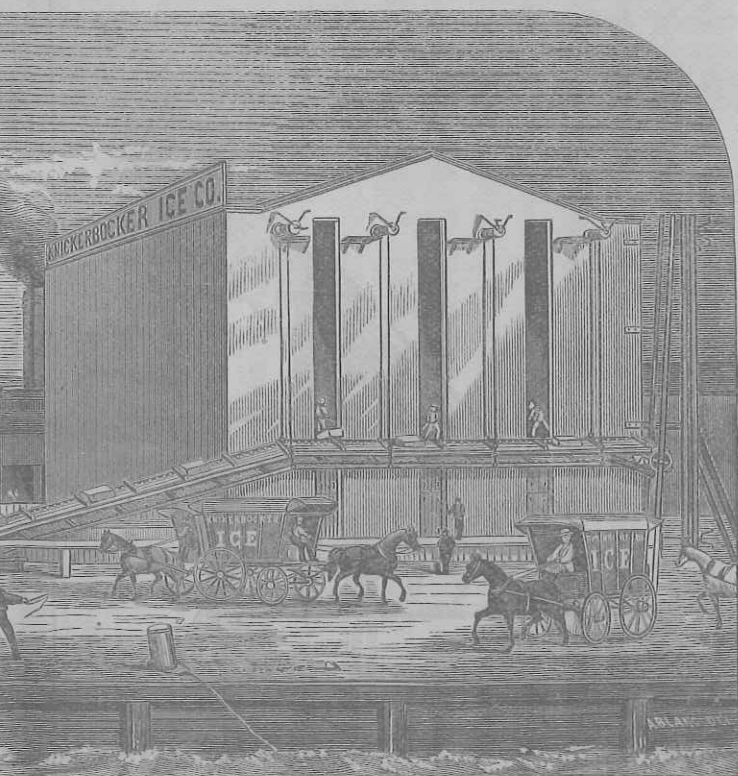

The above cut represents our newly patented machine for unloading Ice from vessels or cars, and carrying it along the platform to the wagons, or up into the houses; and by reversing the motion, conducting it down the incline to the wagons or cars.

It can be seen daily in practical operation at our wharves at Hanover St., Delaware and Pine St., Schuylkill, where we cordially invite all interested to come and be convinced that as a rapid and economical motive power and carrying machine it is the peer.

It can be applied successfully to the moving of other classes of merchandise with equally satisfactory results as obtained in Ice.

We will contract to manufacture and build this or any other machinery in use in the business, some idea of the different kinds of which can be obtained by an examination of our models on exhibition.

We desire to call the particular attention of Ice dealers to our *Model Wagon* to be seen in the wagon department, Agricultural Building, which for all practical purposes is superior to any in use, and also to state that we have lately made the construction of Ice cars a speciality.

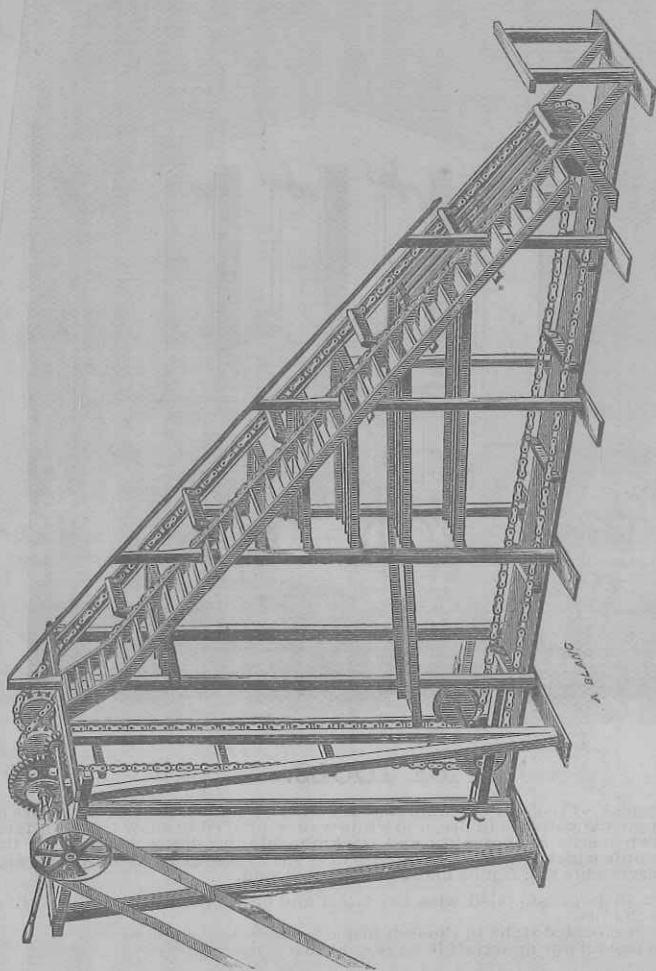

ICE TOOLS.

The samples of tools of our manufacture which we have on exhibition, are of the most approved patterns in use, and while we are satisfied to allow them to stand on their own merits as to quality and workmanship, we desire to mention the following points which enable us to offer them at the lowest price for which a really good and serviceable tool can be manufactured and sold.

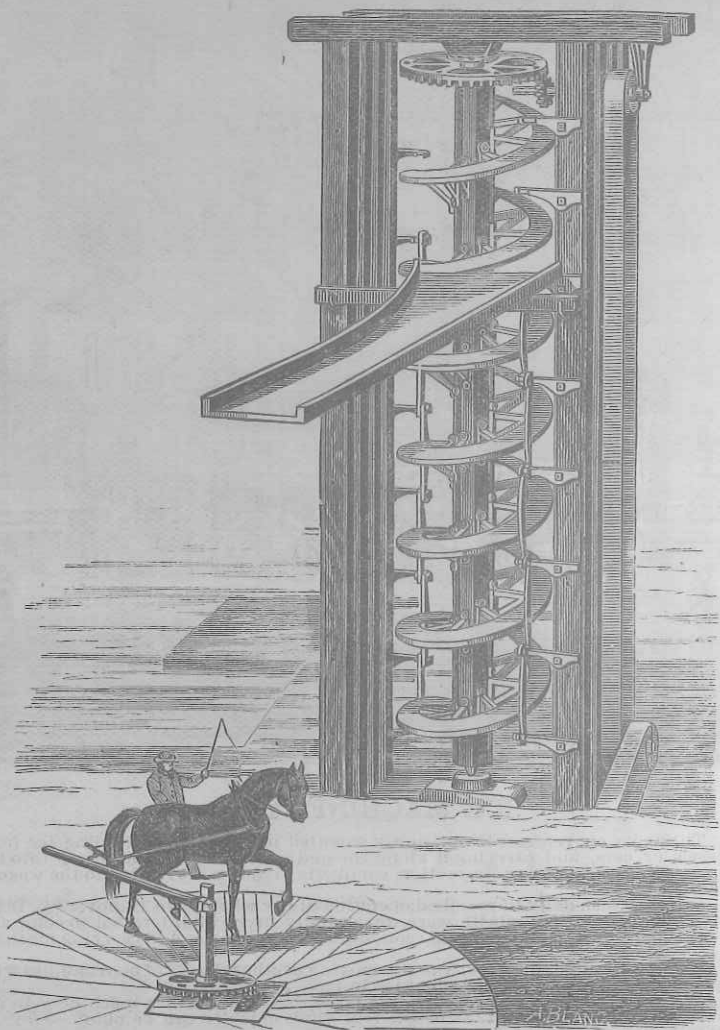

- 1st.—Our shops are supplied with the latest and best machinery, run by skilful mechanics.
- 2d.—We are located right in the iron market, and *import our own steel.*
- 3d.—We buy all our materials in large quantities, for *cash only.*

We are consequently able to invite and defy competition in our particular lines.  Send for price lists, which are revised and corrected yearly, and ready for distribution in the fall, containing matters of general interest to the Trade.
